DIRECTORS: J. Taylor Ellyson, President; Norman V. Randolph, John S. Ellett, John B. Pur-CARLTON McCARTHY, Secretary and Treasurer, Box 408. Extract from the annual report of the Secretary and Treasurer, covering the business for the year 1891:

TO THE SHAREHOLDERS: The foregoing statement presents for your information and for your consideration the business of the

past year, commencing January 1, 1891, and ending December 31, 1891, and shows the condition of the Association at the close of the year. As required by the by-laws, the profits of the Association have been ascertained at the end of each quar-

ter, four times during the year, and have been each time distributed to the accounts of the shareholders. The total of these four dividends is equivalent to 14 per cent, upon the total of the capital stock account of the Association December 31, 1891. By careful management, including close and constant supervision of the business in every detail, the

managers have been able to save TWO-THIRDS of the fund provided for the conduct of the business and known The INTEREST account of the Association, in the beginning necessarily small, begins to show the profits

of our collected cash capital now, since the foregoing figures were made, a round \$400,000. We start the new year with this handsome sum, safely invested and yielding good returns, and have good reason to believe that it will approach nearly to a million dollars before the end of this year. here have been during the year past no Losses charged off, and we see nothing which looks like a prob-

able loss in the future. Despite the widespread loss of confidence caused by the fatal results of many deceitful schemes hastily and eagerly accepted by our people during the past year, the stock of this Association has grown steadily in the estimation of the public and has won the entire confidence of the people who know us best-our home

The business of the first month of the new year indicates clearly that we will have a year of unprecedented success.

Our shares in force have increased from 22,598, December 31, 1890, to 27,319, December 31, 1891, and the sales are now increasing the number daily, and practically, WITHOUT SOLICITATION. As we write this, February 1st, our shares in force are actually 28,436, an increase since January 1st of 1,117.

We intimated in our last "Annual Report" that the expenses of the business would probably decrease, and we are glad to be able to say that, with our business more than doubled in volume, our expenses have been actually less than for the previous year.

While we have stated above that our dividends aggregate 14 per cent, upon the capital stock, it may be well to say that, as a part of our capital stock, or paid-up cash capital, consists of "advance payments," which are not credited with dividends until the time comes when those payments would ordinarily be made (the parties who made them having been allowed a "rebate"), the dividend credited to each individual shareholder is more than 14 per cent.—is actually .2086 per cent. upon the total amount to his credit December 31, 1891.

We feel that the results of the year's business warrant us in congratulating the shareholders and in predicting for the year now before us an active and progressive business with equally satisfactory results at
